

PORTFOLIO

WE CREATE NUTRIENTS®

We manufacture and market novel, branded ingredients which are used in food, beverage, and supplement products. 100% of these ingredients are produced in our own factories in Italy and Brazil. Perhaps you have seen one of many finished products on the market which contain our unique ingredients.

As a recognized world leader in nutraceuticals, we are ready to guide you through product sample evaluation, technical application assistance, scientific information support, pricing, and product availability so you can fully experience our beneficial nutrient solutions.

BUILT NOT BOUGHT

This is a maxim in the automotive community that suggests enthusiasts that build their cars or motorcycles are held to a higher standard since the act of building their own machines shows hard work and knowledge, not just deep pocketbooks.

Similarly, while many branded ingredient suppliers rely on third-party manufacturers, Chemi Nutra is different. At Chemi Nutra we do not just buy generic raw material from some unknown manufacturer, slap a trademark and logo on it, and sell it at a premium. In contrast, we are a vertically integrated business unit of an Italian pharmaceutical, nutraceutical, and fine chemical manufacturer. Thus, our offerings are unique, our quality is very high, and our expertise is very strong.

DESCRIPTION

INDICATIONS

APPLICATIONS

DOSAGE GUIDE †

AlphaSize
Alpha-Glycerol Phosphoryl Choline

An advanced choline compound that promotes brain metabolism. It supports levels of acetylcholine, the body and brain's primary neurotransmitter chemical; which is why it is often considered a mind-to-muscle ingredient.

- Sports Nutrition
- Cognition
- Energy
- Esports

- Capsules & Tablets
- Powder Drink Mixes
- Ready-to-Drink
- Hot Beverages
- Gummies
- Bars
- Specialty

100 – 600 mg per day based on active dose.

CholineAid
Alpha-Glycerol Phosphoryl Choline

The most highly bioavailable form of choline known to man. It directly competes with other choline sources, like choline bitartrate and choline chloride; but is much better for cognition support.

- General Nutrition
- Cognition
- Sports Nutrition

- Capsules & Tablets
- Powder Drink Mixes
- Ready-to-Drink
- Hot Beverages
- Gummies
- Bars
- Specialty

100 – 600 mg per day based on active dose.

IronAid
Iron Protein Succinylate

The most advanced iron compound in existence which is very effective for individuals of any age. Compared to other traditional iron compounds, it offers safe, gentle, superior gastric tolerability, as well as superior, long lasting absorption characteristics.

- Women's Health
- Women's Performance
- General Nutrition

- Capsules & Tablets
- Powder Drink Mixes
- Ready-to-Drink

140 – 540 mg (yielding 7 – 27 mg iron) per day.

Mediator
Phosphatidic Acid

A lipid messenger that supports muscle protein synthesis through the Mammalian Target of Rapamycin (mTOR) pathway. It can help individuals gain both lean muscle mass and strength when accompanied with weight bearing or aerobic exercise, and adequate protein intake.

- Sports Nutrition
- Healthy aging
- Body Composition Mgmt.

- Capsules & Tablets
- Powder Drink Mixes
- Ready-to-Drink
- Hot Beverages
- Gummies
- Bars

200 – 750 mg per day based on active dose.

SerinAid
PhosphatidylSerine

An efficacious nutrient that can help support mental performance, memory, learning, concentration, focus, recall; and can help improve mood and reduce occasional stress.

- Cognition
- Mood & Stress
- Sleep
- Sports Nutrition

- Capsules & Tablets
- Powder Drink Mixes
- Ready-to-Drink
- Hot Beverages
- Gummies
- Bars

100 – 300 mg per day based on active dose.
